

DESIGN SYSTEM & IDENTITY PROPOSAL

Scale Partners

Gradient-First Design Guidelines

A premium branding transition proposal from corporate blue to deep forest obsidian and vibrant emerald green. Replaces all solid gray fills and black borders with layered green shadows, mint overlays, and high-fidelity parallax assets.

01 — BRAND MOOD

Identity defined by intention.

01

Professional Credibility

Deep forest shades communicate trustworthiness, stability, and structural integrity — foundational for accounting, bookkeeping, and tax services.

02

Modern Energy

Electric emerald highlights guide user attention, signaling growth, precision, and financial technology built for the modern era.

03

Sleek Usability

High-contrast interfaces with soft sage borders and glassmorphic layers maintain a clean, highly readable layout at every breakpoint.

02 — COLOR PALETTE

Every shade, purposefully chosen.

A structured palette that transitions from obsidian depth to emerald vitality — conveying authority without sacrificing warmth.

**Forest Obsidian**

#07140B

Page backgrounds, footer blocks, hero section foundations.

**Deep Forest**

#0C2E1A

Dark cards, headers, and primary container elements.

**Medium Sage**

#284431

Muted border and surface accents in dark containers.

**Scale Emerald**

#12B76A

Primary brand color. Buttons, keywords, icons, and status badges.

**Neon Green**

#22C55E

Hover states, glowing highlights, and active focus ring states.

**Soft Sage**

#7A9A85

Secondary muted text on dark backgrounds and helper typography.

**Mint Off-White**

#F7FBF8

Universal light background replacing standard off-white.

**Mint Tint**

#E6F7ED

Table headers, chip backgrounds, and alert containers.

**Mint Gray**

#D5E8DD

Fine lines, grid dividers, and inactive borders.

03 — GRADIENTS

Flow and depth in motion.

Three gradient presets give the interface fluidity — from deep resting states to vibrant active moments.

.bg-brand-dark-grad

Deep forest background gradient. Used for hero sections and dark-themed containers. Direction: 135°

#07140B at 0%

#0C2E1A at 100%

.bg-brand-grad

Emerald active gradient for CTAs and text heading accents. Direction: 135°

#0C2E1A 0%

#12B76A 50%

#22C55E 100%

.hover-bg-brand-grad

Rich hover gradient that fires on mouse interaction. Direction: 135°

#0B2E16 at 0%

#08854C at 100%

04 — COMPONENTS

How the palette lives in the interface.

Each component maps directly to palette tokens — no one-off colors, no exceptions.
